14d Sell/Buy-Higher Count	115	Est. Round-Trip Cost	\$34.8M

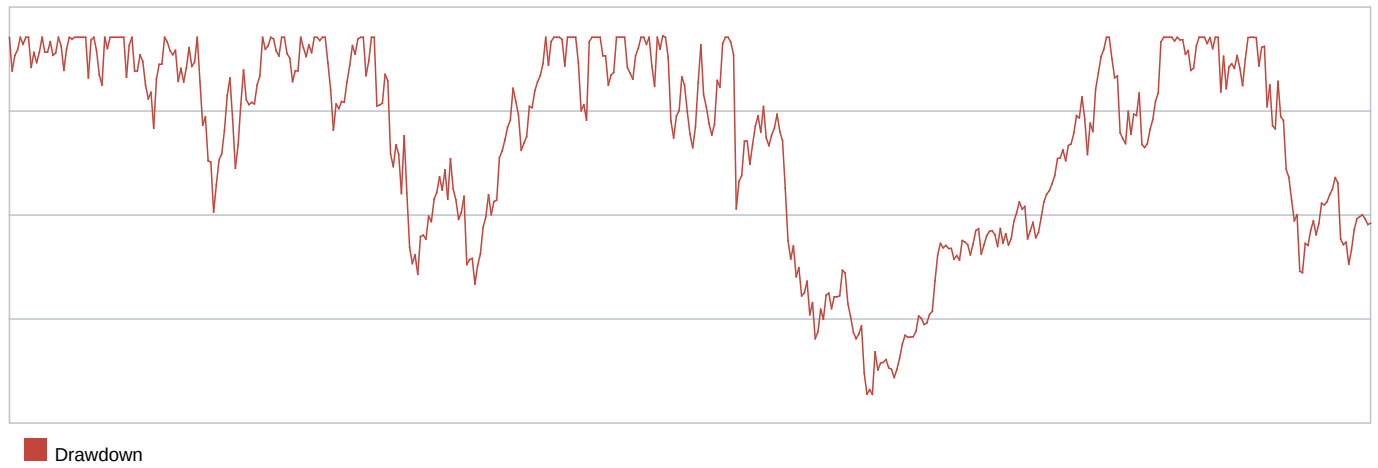

PDS hardening status: the replay harness now treats PDS WARNING as advisory-only for trade-trigger purposes, matching the briefing language that WARNING has no mandatory action. DELEVERAGE_1 and DELEVERAGE_2 remain mandatory ceiling changes. The saved output still records WARNING state transitions for audit visibility, but WARNING alone no longer qualifies as a PDS rebalance trigger.

PDS Audit And Feedback Summary

The corrected interpretation is now: NORMAL and WARNING are non-mandatory PDS states for rebalance triggering; DELEVERAGE_1 and DELEVERAGE_2 are the only mandatory PDS trade states. This matches the briefing documents: WARNING is a warning/advisory state, D1 is a 60% ceiling, D2 is a 30% ceiling.

Remaining PDS churn visible in the ledger comes from true D1/D2 threshold crossings and the staged ARES re-entry process. Adding a new PDS exit buffer or arbitrary hysteresis would be a parameter change not explicitly supported by the reviewed briefing language, so it was not invented in this report build.
